

RESOLUTION IT MANAGED PRINT SERVICE

Resolution IT's Managed Print Service provides an all-in-one service, encompassing automated toner replenishment, maintenance, monitoring, parts and repair, supported by a dedicated and certified team of engineers. You simply pay for what you print and we take care of the rest.

Our proactive monitoring software will continually provide our team with the current level of all replaceable parts in your machine. This allows us to automatically replace parts before they reach the end of their lifecycle.

We are happy to have partnered with Kyocera Document Solutions, one of the 231 companies within the Kyocera Group. Kyocera's Brand Charter is committed to creating value that exceeds customer expectations, promising performance that amazes and delights in the areas of technological strength, superior quality and responsiveness.

Only pay for what you print

24/7 monitoring

Dedicated team

Kyocera certified

Scheduled health checks

Scheduled updates

Minimal business disruption

We believe the range of Kyocera multi-function printers we are offering are the pinnacle of printing excellence, with a particular focus on:

ECONOMY

Amorphous silicon (ASI) drums with a lifetime of 600,000 prints are still unique in the class of mid-speed A3 colour multi-function printers. High reliability means less downtime and increased savings

USABILITY

User-friendly, customisable home screen with simple and intuitive menu. Enhanced functionality and usability thanks to improved driver. Extended mobile-device support: Mopra, Airprint, NFC, Wi-Fi Direct

SECURITY

SSD and HDD encryption comes as standard. Optional data security kit with support for integrated ID card authentication with multiple card technologies. Ensures no data is left on the hard disk once you've finished printing, copying or scanning

RELIABILITY

Named as the most reliable brand for colour copiers

ENVIRONMENT

Uses as little energy as possible, energy is only used when needed and renowned long-life components save resources

EXCELLENCE IN PRINTING

Kyocera offers highly advanced, reliable, multifunctional colour devices, producing stunning resolution with brilliant vividness and astounding sharpness. Packed with the latest technology and able to complete high-capacity jobs effortlessly, the new TASKalfa range of multi-function printers produce some of the best-quality colour prints available on the market, taking your work to a whole new level.

COLOUR BRILLIANCE

Built around superfine toner technology that offers an increased colour range, the high-resolution TASKalfa devices we are offering, produce sharp, vivid results and a wider range of colours. Add to this the evenly coated light, thanks to improved homogenous toner coating and Kyocera are confident your printouts will make a seriously positive impression. However, there's more to these devices than image alone.

Behind the extremely intuitive interface, they support oversized paper and duplex printing, extended paper weight and have a reduced warm-up time. With high print resolution, various paper feeders and finishing options that deliver fast continuous printing and high-volume results, the TASKalfa 6052ci series opens the door to a whole range of in-house production possibilities.

WIDE RANGE OF PAPER-HANDLING OPTIONS

For high-volume jobs, additional paper trays can increase the paper capacity of your TASKalfa device up to 7,150 sheets, providing hours of continuous non-stop printing if required. There is a choice of two extra document processors and two finishers – one of which comes with an optional booklet unit.

For all internal light-production needs, the series supports a wide range of paper sizes and formats, from A6 up to SRA3 which, combined with superior image quality, can be used to print colour graphics – complete with crop marks – onto SRA3 paper, allowing the accurate trimming of full-bleed edge-to-edge A3 printouts.
