

vCISO

Virtual Chief Information Security Officer

Managed Security Service

Our vCISO service gives you access to qualified information security professionals, who will work to ensure your most important information assets and technologies are best protected against modern-day threats.

We can establish standards and controls, advise the board, manage your security technologies and implement policies and procedures.

What is included?

Information security policy framework

Risk register maintenance

Cyber security roadmap

Updates for your board

Asset management policies & registers

Insights into emerging threats

Incident reporting

Assistance towards compliance with regulatory standards

What are the benefits?

Qualified team working to recognised industry standards in a scheduled manner

Save on the costs of finding and hiring a CISO professional

Access to a team of professionals, rather than just one

Independent & unbiased advice

Salary range of CISO

Over 2 million phishing sites registered by Google

of observed malware can change its code to evade detection

is lost to cybercrime every minute

“This gives us total peace of mind that not only have we met all cyber security regulatory requirements but that we are being looked after by a proactive and experienced team of cyber security experts.”

Rob Newton, Director, Mid Europa Fund Management
